[About Dr. Babinet](#)

Dear Bertrand,

How can we not be lifted by the arrival of Spring? Each new blade of grass and each hopeful birdsong restores and inspires us to engage our best selves in honor of life. How very fortunate we are to always be able to begin again.

In the words of Emerson, "In nature every moment is new; the past is always swallowed and forgotten; the coming only is sacred. Nothing is secure but life, transition, the energizing spirit."

What wants to be renewed in your life? We would love to support you in making your life the life you intend.

Detox and Radiant Health

Be Ready for a Beautiful Spring and Summer

Springtime is the PERFECT time to get rid of unwanted toxins in the body that kill overall energy levels, increase body weight and the risk of disease. Any qualified integrative physician will tell you that ***detoxification is no longer a luxury***. It's a necessity for living in the modern world.

Through June 31 we are offering an individualized detoxification program to restore and regain optimal health.

Detoxification is a Natural Function of the Body

This program is **not** a heavy detox program that stresses the body. The intent is to provide a simple, practical program to assist you in restoring the natural ability of the body to take care of itself.

There is No One-Program-Fits-All

Each person will be assessed in terms of bodily excesses and deficiencies so a protocol can be designed to fit their individual needs. This typically includes a comprehensive program of vitamins, minerals, essential fatty acids, and herbal support for each of the primary systems of the body. [The Prime Formula](#) is ideally suited as a baseline for this purpose. Additional products may be added to address specific issues related to absorption, sugar metabolism and cardiovascular health as well as specific male or female aging processes.

For the cleansing we recommend a simple homeopathic protocol called Systemic Drainage designed to open the pathways of detoxification in the liver, kidneys, intestines and the spleen. This is a gentle comprehensive approach that helps restore optimal health.
